OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
Pink Salmon	August 14, 1996	X		X	X
King Salmon	August 14, 1996	X		X	X

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Observed about 400 pink salmon and one King salmon below bridge while walking proposed Swan Lake to Lake Tyge Intertie alignment. The preliminary access road drawings for the Intertie Project (dated 3/30/96) show this as Station # 82 + 40. Also, this is just below unit #45 in the Carroll Inlet Timber Sale. The active channel below the bridge is about 40 feet wide. It flows directly into Carroll Inlet, and not the Carroll River.
